American, AMR Eagle, and the AmericanConnections® airlines serve 250 cities in 40 countries with, on average, more than 3,400 daily flights. The combined network fleet numbers approximately 900 aircraft. American Airlines is also a founding member of the global oneworld® Alliance, which enables member airlines to offer its customers more services and benefits than any member airline can provide individually. These services include a broader route network, opportunities to earn and redeem frequent flyer miles across the combined oneworld network and more airport lounges. Together, oneworld members serve nearly 700 destinations in over 150 countries, with 8,500 daily departures. American is also one of the largest scheduled air freight carriers in the world, providing a wide range of f...

JT3

JT3 provides engineering and technical support to four of the western test ranges for the U.S. Air Force and Navy under the Joint Range Technical Services Contract, better known as J-Tech.

The company is a joint venture of Raytheon and URS, an AECOM company (formerly EG&G) and is supported by 9 teammate companies. Together we develop and maintain realistic integrated test and training environments. We prepare our nation’s war-fighting aircraft, weapons systems, and air crews for today’s missions and tomorrow’s global challenges.

Kerson Dynamics

Kerson Dynamics developed a web-based platform for managing oil and gas royalties. We collect, enter, and track all of the data associated with a royalty owner’s assets. Owners then have access to view the information and the extensive data analysis as well as run reports on various aspects of their holdings. Kerson Dynamics combines this web-based platform with a modular management system that allows royalty owners to customize their experience from simple website access up to and including full concierge management.

Mesa Airlines

At Mesa, Recruiting Is About Pilots Helping Pilots Progress In Their Careers

Pilots choose Mesa because of the real opportunities that exist for both experienced pilots and newcomers to the industry. Mesa’s training, job security and upgrade times are second to none. A testament to our success and future opportunities - is the fact that - while our growth is among the fastest in the industry, our pilot attrition is among the lowest.

Our fleet of large regional jets has grown to 133 with 12 more scheduled for delivery in 2017...yes, our fleet doubled in two years and we expect to continue our growth. We’re the only regional airline with no small aircraft to park and our codeshare agreements are among the longest in the industry. We understand your career goals.

Tyler Technologies is the largest software company in the nation solely focused on providing integrated software and technology services to the public sector - cities, counties, states and school districts. Success requires the right combination of many factors - a well-designed strategy, consistent execution, feature-rich and industry-proven products, talented employees and a solid brand identity. Underscoring each of these components is the one fundamental question: how can we empower the people who serve the public? The simplest answer for us is to develop, implement, and support software solutions that deliver - again and again. Forbes has named Tyler one of "America’s Best Small Companies" eight times and the company has been included six times on the Barron’s 400 Index.

United States Postal Service

The USPS’s “Management Foundations Program” is an 18 month long full time paid rotation program. After the 18 month program, the individual will be placed into a professional position outside the program. The career entry program allows a bridge from college to a full time career. It is a developmental program that allows professional growth through mentoring relationships. The program also provides executive support and exposure.

UTC Aerospace Systems is one of the world’s largest suppliers of technologically advanced aerospace and defense products. We design, manufacture and service systems and components and provide integrated solutions for commercial, regional, business and military aircraft, helicopters and other platforms. We are also a major supplier to international space programs.

In 2012, UTC Aerospace Systems was formed by combining two industry leaders-Hamilton Sundstrand and Goodrich-creating an organization with key positions on nearly every aircraft flying today and substantial content on various UAVs, satellites and ground and naval vehicles.

Our customers include original equipment manufacturers that build aircraft and helicopters, engine manufacturers, and airlines, as well as defense age...
